## DETAILED ACTION

### *Election/Restrictions*

1. Claims 4-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected method, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 9/30/05.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 2002-157727 (see Japanese document and English translation) as evidenced by Applicant's admission of what is old in the art (p.2, last paragraph to p. 3, line 4).

JP 2002-157727 discloses a magnetic recording medium having a magnetic layer formed from magnetic particles formed from CuAu or Cu<sub>3</sub>Au materials such as Co<sub>3</sub>Pt, FePd, and CoPt (paragraph 11 of Japanese document discloses these materials for magnetic particles). Applicant teaches that it is known in the art to deposit magnetic particles on an organic support as shown by JP 2002-157727 (see specification, p. 2, last paragraph to p. 3, line 4).

Art Unit: 1773

It is noted that the preamble limitations of the claims have been considered. However, they are essentially recitations of intended use and do not patentably distinguish the claimed structure over that shown in the prior art.
